# PREVENT TOOL THEFT

MORE INFO

| Tool Record Keeping | Sync Wirelessly | Save Receipts | See Utilisation | Tool Transfers & Reports | Track Tool History | Upload & Download Inventory |

NEW

NEW FEATURE
GEOFENCE ALERT

GEOFENCING

Add perimeters to your job sites - if your tools are seen outside of the geofence, you will be alerted

TOOL TRACKING

- Track your tool's location from anywhere
- Lock your tool and disable remotely
- Hide your tools from the Nearby Devices screen
- Use TICK™ to track non One-Key™ enabled tools
- Manage your inventory

INVENTORY MANAGEMENT

ONE-KEY™ is a FREE, easy to use web and mobile platform to keep a virtual eye on your things

FREE APP — App Store · Google Play

- Integrated Tool Tracking allows you to have full visibility of tool utilisation across your network of jobs and users

- Identify your One-Key™ devices up to 30m range of your phone - no battery necessary for tracking

- Snap receipts, log purchase info, set up service reminders, and assign tools out to your employees

- Manage down to the project level. Pull reports on recent spend, run audits on tools out on location even pull the full cradle-to-grave story of one of your items

- Set boundaries for the team in the field with guest login - set permissions on who can control what tools

- Left a tool behind? Easily pinpoint the last time and location you were within 30m of your missing tool

- Customise your tool performance - save up to four customised profiles to the memory of the tool, and cycle through them when needed throughout your day, then prevent anybody from tampering with the settings by locking the footpad

MULTI-USER MANAGEMENT

Create an interactive team experience by inviting multiple people to join your One-Key™ account

NEW

- Streamline workflows

- Manage inventory across different teams and jobsite

- Connect with co-workers and provide different permission roles:

  Admin, Tool Manager, Projects, Item Only, View Only
